**Missouri Weekly Hay Summary 04/02/2020**

Almost hard to believe it is now April, following some severe storms last weekend that saw some areas of the state getting some very damaging hail, the weather seems to try to straighten up a bit. A lot of fertilizer has finally been spread in the last week and finding a buggy to rent became somewhat difficult. There was even a small amount of field work done in some of the far northern parts of the state, but producers had to really pick and choose what fields they pulled into. Hay season is officially under way as reports from several southern states of hay cutting taking place. The supply of hay is moderate, demand is light, and prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or to view the directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales.
